PROFILE

AI Engineer with hands-on experience in machine learning, Generative AI, RAG, GraphRAG, computer vision, and AI automation. Skilled in building and evaluating Python-based AI applications and integrating them into practical business and industrial workflows.

PROFESSIONAL EXPERIENCE

- Computer Vision & AI Intern, Hummink** 03/2026 – 08/2026 | Paris, France
 - Developed a computer vision system for sub-pixel dimensional measurement in an industrial printing environment.
 - Designed and implemented image preprocessing, segmentation, feature extraction, and measurement algorithms.
 - Evaluated algorithm performance under varying imaging conditions and validated results against reference measurements.**Tech Stack:** Python, OpenCV, NumPy, Gitlab, Jira, Image Processing
- Generative AI and Automation Intern, Talan** 06/2025 – 08/2025 | Tunis, Tunisia
 - Developed a Retrieval-Augmented Generation (RAG) agent for enterprise knowledge retrieval.
 - Built and integrated a GraphRAG pipeline using Neo4j to improve contextual knowledge representation and information retrieval.
 - Developed AI-powered automation workflows using n8n and MCP servers, integrating tools and external services.
 - Implemented autonomous workflows for document management, information retrieval, and business process automation.**Tech Stack:** Python, RAG, GraphRAG, LLMs, Dify, n8n, Neo4j, MCP, Docker, APIs
- Artificial Intelligence and NLP Intern, Technozor** 07/2024 – 08/2024 | Tunis, Tunisia
 - Developed NLP solutions for strategic roadmap analysis and optimization.
 - Built and evaluated machine learning models for text classification and predictive analytics.**Tech Stack:** Python, spaCy, Transformers, Machine Learning, NLP
- Programming and Robotics Instructor, Play Mind** 09/2023 – 05/2025 | Tunis, Tunisia
 - Mentored programming and robotics teams, with teams reaching national and international competitions.**Tech Stack:** Spike Prime, Scratch, Python

PROJECTS

- Google Workspace AI Automation Agent**
 - Developed an AI assistant enabling natural-language interaction with Gmail and Google Drive; automated email processing, document management, and file retrieval through tool-integrated workflows.**Tech Stack:** n8n, Docker, Google APIs, LLMs, JSON
- Hand Gesture Control System**
 - Developed a real-time hand gesture recognition system using YOLO, achieving 95% accuracy; integrated the model with an ESP32-controlled 3D-printed robotic gripper.**Tech Stack:** Python, OpenCV, MediaPipe, NumPy.
- Intelligent AI Web Research Agent**
 - Built an automated web data extraction and processing workflow with a conversational AI assistant; integrated external tools through MCP-based workflows for real-time information retrieval.**Tech Stack :** n8n, Firecrawl API, Google Gemini, MCP tools, Docker, JSON.
- IoT-Based Environmental Monitoring System for Agriculture**
 - Developed an IoT pipeline processing multi-sensor data and reducing manual monitoring time by 80%; built a predictive Air Quality Index model.**Tech Stack:** Python, Jupyter, scikit-learn, TensorFlow, PyTorch, Pandas, NumPy
- Nanoscale Printing Inspection**
 - Developed a computer vision inspection system used by product and process engineering teams to verify print centering and detect alignment errors during early integration phases.**Tech Stack:** Python, OpenCV, NumPy, Image Processing

EDUCATION

- Engineering Degree in Instrumentation and Artificial Intelligence,** 2022 – 2026
National Institute of Applied Science and Technology (INSAT)
- Integrated Preparatory Program in Mathematics, Physics and Computer Science,** 2021 – 2022
National Institute of Applied Science and Technology (INSAT)

SKILLS

- Machine Learning & AI:**
Machine Learning, Deep Learning, Generative AI, LLMs, RAG, GraphRAG, NLP, Computer Vision, Object Detection, Image Segmentation
- Frameworks & Libraries:**
PyTorch, TensorFlow, scikit-learn, Hugging Face Transformers, spaCy, OpenCV, MediaPipe
- Data & Analytics:**
Data Preprocessing, Feature Engineering, Model Training, Model Evaluation, Predictive Analytics, Text Classification, Information Retrieval, Pandas, NumPy
- Software & AI Tools:**
Python, Git, GitLab, GitHub, Docker, REST APIs, JSON, Neo4j, Dify, n8n, MCP, Jupyter, Jira

LANGUAGES

- English — Professional Proficiency
- French — Professional Proficiency
- Arabic — Native
- German — Basic
